IT SPECIALIST

The GIGA biomedical research center of the University of Liège ([http://www.giga.ulg.ac.be/](http://www.giga.ulg.ac.be/)) is seeking an IT specialist for an immediately available position.

Please follow this link to discover the GIGA: [www.giga.ulg.ac.be/videos](http://www.giga.ulg.ac.be/videos)

**Function**

The successful candidate will join the GIGA team of IT specialists and bioinformaticians. She/He will work in close collaboration with the SEGI ([The General IT Department – SEGI website](http://www.giga.ulg.ac.be/videos)) in charge of the infrastructure support, with the UDI ([The decentralized IT unit](http://www.giga.ulg.ac.be/videos)) of the Faculty of Medicine in charge of the user’s support, and with the GIGA technology platforms ([GIGA-Technology Platforms](http://www.giga.ulg.ac.be/videos)).

The **main tasks** of the IT specialist will be:

- To assist the GIGA scientists to better use the GIGA computer infrastructure (including a cluster dedicated to high-performance scientific computing, a mass storage system coupled to a tape-based backup system) by:
  - Installing specific scientific tools.
  - Setting up support documentation explaining the rules for access and how to use the computing infrastructure,
  - Giving trainings to the users on specific tools and languages
  - Providing scientific-IT support to the GIGA scientists on a daily basis
- To ensure that the rules of usage (IT Policy) are respected

**Profile**

- IT bachelor.
- Knowledge of LINUX and scientific programming languages like Python, PERL, R, …
- Excellent communication skills.
- Interested by scientific matters.
- Having an experience of working in a scientific environment is an asset.
- Flexible, self-motivated, and autonomous with strong analytical and organizational skills.
- Good skills in French or in English.
- Full time position
