

Technician – Medical device field

CMD-COAT SA, a spin-off company of the University of Liège, Liège, Belgium (www.cmd-coat.com) is searching for a technician. The position will be available from the 1st of April 2022 for a full-time **1-year contract** with renewing possibility.

The company offers you a challenging position in a small dynamic team, acting at the forefront of a new and innovative technology in the field of medical devices, which can directly save lives. You will have the opportunity to build up some work experience in the framework of an emerging company aiming at bringing their technology to the EU and US markets.

You will be a key player in the success of our product development. This is a high impact career growth opportunity, working side by side with two project leaders, experts in polymer chemistry and in hemostasis.

Profile

- You possess a **Bachelor** degree in Chemistry, Biochemistry, Bioengineering or equivalent
- Experience in **polymer chemistry or hemostasis** is an asset
- You are interested in the medical world and innovative technologies
- Background knowledge in surface chemistry or coating techniques is a competitive advantage
- You are well organized and rigorous
- You have strong analytical and creative problem-solving abilities
- You are able to maintain accurate documentation of protocols and data, and generate written reports
- You are team oriented, and you have good communication skills in French and in English

If this opportunity is matching your profile and you are looking for a new challenge, please do not hesitate to forward your CV with a cover note detailing your experience to:

Cécile Oury, PhD, Co-founder and legal representative of CMD-COAT SA: cecile.oury@cmd-coat.com
