

Postdoctoral Position

The Laboratory of Biology of Tumor and Development, GIGA-Cancer (Prof A. Noel) at the University of Liège (Belgium) has an opening position for a **post-doctoral fellow** for one year (2022, starting on December 2021 or January 2022).

The project in **cancer biology** is related to mechanisms leading to metastasis formation and lymphatic vasculature dysfunction (lymph node pre-metastatic niche and lymphedema). It involves cellular and molecular biology, as well as innovative in vivo assays.

We plan to investigate fibroblast and endothelial cell heterogeneity through single cell sequencing.

This position offers the opportunity to integrate a team working on lymphatic biology, in a dynamic environment inside the GIGA-Cancer.

Profile:

- Ph.D. in Sciences or Biomedical Sciences
- Research experience in in vivo assays (FELASA certificate)
- Motivation and scientific curiosity with a collaborative mindset

Please send your letter of motivation and full CV to agnes.noel@uliege.be, as soon as possible and at the latest on 15/11/2021.
