We invite highly motivated candidates to apply for a PhD fellowship in the Molecular Pharmacology research group (Dr. Julien Hanson) at the Interdisciplinary Cluster for Applied Genoproteomics (GIGA) of the University of Liège, Belgium.

The project aims at studying cyclic AMP signaling in the context of cancer, cellular proliferation and G protein-coupled receptors signaling and will involve molecular biology of receptors, biochemistry of signaling and cellular models. The fellowship aims at the obtention of PhD diploma after 48 months of research. The position can start on December 1st at the earliest.

The individual will be expected to have high motivation and broad autonomy. He/she will also be likely to interact with other research groups and members of the team. He will actively participate to everyday management of the lab and to the seminar program of the institute.

REQUIRED QUALIFICATION:

- Master in Biomedical Sciences, Pharmacy, Biochemistry, Molecular/cellular biology.
- Experience in molecular & cellular biology techniques is a plus.

Applications, including a cover letter detailing motivations, CV, names and contact details of 2 referees should be sent before November 10th, 2021 by e-mail to:

Dr. Julien Hanson
